UC RESOURCES LTD. REPORTS LA YESCA'S GOLD & SILVER PRODUCTION UP 80%

March 15, 2007 UC Resources Ltd.: Torreon, Coahuila, Mexico & Vancouver, British Columbia: Trading Symbol: TSXV:UC. UC Resources Ltd. (the Company) is providing the third update on its newly commissioned plant at the La Yesca Gold and Silver project situated at La Yesca, Nayarit, Mexico.

The Mill, which was commissioned and began operations in January (see news release dated Jan 30, 2007), is a copper-ammonium thio-sulphate facility at La Yesca, Mexico. The Company is pleased to report on the mill's progress, in this the third biweekly progress report.

During the 14 day period ending March 14, 2007, the mill has processed 924 tonnes of tailings material (an increase of 411 tonnes or 80% over the previous biweekly period) with grades averaging 2 grams per tonne (g/t) gold (Au) and 220 g/t Silver (Ag) for an average daily production of 84 tonnes per day over the 11 day span of operations. The net results of the modifications to the process in this period show an operating time increase of approximately 22% over the previous period. Downtime for this period was slightly less than 3 days as compared to 5 days in the previous bi-weekly period.

An independent metallurgist is back on the site as of yesterday, and will continue to be available to help modify and improve the process in order to reach the facility's stated capacity of 200 tpd.

An update to the existing National Instrument (NI) 43-101 compliant report has been commissioned and will be made public upon completion.

States Richard Hamelin, President of UC Resources: "We are very pleased with the progress at La Yesca. We are currently processing approximately 100 tpd right now and this facility seems to be meeting and exceeding our expectations. We are confident that we will achieve the 200 tpd capacity of the mill. The plant's efficiencies are very consistent, with recovery rates of 72% for gold and 70% for silver. We are initially concentrating on increasing tonnage and achieving a higher uptime. Once we achieve our tonnage goals, we will focus on increasing recovery rates to 80% for both silver and gold."

This press release has been prepared by management of UC Resources Ltd. and has been approved for dissemination by Neil Novak P. Geo. of Cambridge, Ontario, a Qualified Person under Canadian Securities guidelines, in his capacity as Vice President for UC Resources Ltd.
